Many of the items/ actions described are taken out of hide. In a way, this is a partial list of "new" items taken out of base during the past 10 months.

From another viewpoint, it is doing things like these for the DCI which make us sharp.

RECEIVED

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney
Director of Information TechnologySUBJECT: Communications Support to the Office of the
Director of Central Intelligence

REFERENCE: OIT-9689-86, dtd 8 May 1986, Same Subject

1. During the period from 01 April 1986 through 31 January 1987, the following new initiatives and accomplishments were completed or undertaken by the Domestic Field Group, Office of Information Technology (DFG/OIT), in support of the Office of the Director of Central Intelligence (O/DCI). These requirements were directed to the OIT/OC Referent to the DCI from the Chief, DCI Security Staff (DCI/SS); DCI Administrative Staff; and Chief, Domestic Field Group.

c. Arrangements were made, and assistance was provided, to repair defective DCI/SS VHF equipment. A long term service contract is in the process of being initiated with the manufacturer.

of Central Intelligence 

25X1

d. Assistance was provided to the DCI/SS in ordering and procuring additional VHF equipment to supplement their existing inventory.

e. Assistance was given to DCI/SS in obtaining and modifying hard shell, foam-filled equipment carrying cases for overseas and domestic travel.

25X1

j. VHF antennas were installed on the roof of the DCI residences in Long Island, New York, and McLean, Virginia. The VHF antenna on the roof of the Headquarters Building was replaced to reduce the interference on the DCI/SS VHF net. The 20 watt VHF repeater at South Building, which provides coverage for downtown Washington, D.C., was replaced with a 100 watt VHF repeater and relocated to a permanent location in an air-conditioned area of the building.

25X1

1. Three new wide-screen Grid computers for the narrative flyaway packages have been procured. The new computers replace older model units bought four years ago and provide an enhanced capability to transmit messages into the Agency narrative communications network during flyaway deployments.

m. Modification of the older model Grid computers to provide greatly expanded capacity by the addition of ROM (read only memory) chips continues. Only four of the original computers now lack the ROM modification.

25X1

n. As required, training and equipment assistance was provided to OC/FND to meet their support requirements for the DCI and other senior officials during foreign travel.

25X1

2. Our previous memorandum on this subject is attached for your information.

OIT-9689-86

8 MAY 1986

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney
Acting Director of Information Technology

SUBJECT: Communications Support to the Office of the
Director of Central Intelligence

1. During the period from 01 October 1985 through 31 March 1986, the following new initiatives and accomplishments were completed or undertaken by the Domestic Field Group, Office of Information Technology (DFG/OIT), in support of the Office of the Director of Central Intelligence (O/DCI). These requirements were directed to the OIT/OC Referent to the DCI from the Chief, DCI Security Staff; Chief, DCI Administrative Staff; and Chief, Domestic Field Group.

25X1

b. The addition of VHF close-support equipment, which was jointly funded by O/DCI and OIT, has resulted in the installation of three DB-224 VHF antennas. One was installed on the roof of the South building to provide repeater coverage for the downtown area; another was installed on the roof of the Headquarters building; and one was mounted at the Palm Beach DCI residence. We are presently awaiting approval to mount antennas at the Washington and Long Island DCI residences.

25X1

d. We are exploring the addition of a "private line" module in the VHF equipment now being used by the DCI Security Staff. This feature will eliminate unwanted interference on the VHF net frequencies.

e. In coordination with the Systems/Support Section, Voice Communications Branch, the secure voice systems in the DCI and DDCI vehicles were restored to an operational status.

25X1

k. The storage capacity of the Grid computers used for DCI and VIP support requirements has been greatly expanded by the addition of ROM (read only memory) chips.

l. The addition of direct-connect modems at the DCI residences has enhanced the line quality of the Grid flyaway package.

m. Lexicon acoustical coupler modems have been ordered to replace the existing CAT modems, which are used when it is not possible to accommodate direct-connect modems. These replacement modems are sturdier and provide improved acoustic coupling.
